About Wax Warmer, What is wax warmer for hair removal?

A wax warmer for hair removal is a heating device designed to melt hair removal wax to the perfect temperature for effective hair removal, usually about 120°F (48°C). It comes in various types, including single pot consumer home use and 2 pots professional salon models. By ensuring the wax is heated and kept in certain warm temperature by built-in controller, it minimizes the risk of burns and maximizes hair removal efficiency.

All of Auperwel Brand wax warmers for hair removal are designed for melting all kinds of hair removal wax, built-in temperature thermostat, which will alternate between low temperature to turn on to heat, and high temperature to turn off to stop heating, to prevent overheating.

Choosing the right type of wax heater and wax is crucial for achieving optimal results. In summary, a wax heater is a strong recommended tool for anyone looking for a convenient and efficient method to achieve smooth, hair-free skin.

Wax Warmer

Model	Pro-Wax 100 Wax Heater (PP Plastic)
Plugs Type	US, EU, UK, AU etc
Target Area	Face, Eyebrow, Bikini/Brazilian Area, Legs, Arms, Lips, Back etc Body Hair Removal
Function	Melt Hard wax, Soft Wax, all types of hair removal wax
Pot Capacity	500ML/ 500CC
Voltage/Power	110-240v, 100W
Material	PP Machine Body + PS lid + Aluminum/Silicone Pot

About Hard Wax Beads, What is hard wax beads for hair removal?

Hard wax beans is a type of hair removal wax that adheres to and envelops body hair, solidifying into a film that can be pull off to effectively uproot hair, and extract hair follicles from the root, offering a less painful and efficient waxing experience.

As a leading supplier in China, Auperwel operates from a spacious 10,000-square-meter workshop, equipped with six high-tech wax production lines. Our monthly production capacity reaches up to 500 tons of hair removal waxes, ensuring consistent and reliable supply.

We offer comprehensive waxing solutions for both professional salon use and DIY at-home waxing. Our factory not only provides a range of wax formulas but also customizes formulations to suit specific body hair and skin types. Trust Auperwel for top-quality waxing products and tailored solutions.

Hard Wax Beans

Model	APW-100B1 (100g wax beads per bag)
Form	Wax
Target Area	Face, Eyebrow, Bikini/Brazilian Area, Legs, Arms, Lips, Back etc Body Hair Removal
Function	For hair removal wax
Capacity	100 Gram (3.5 Oz) Per Bag
Feature	No-strips
Ingredients/ Material	Rosin/ Resin (Rosin-Free, Synthetic Hypo-allergenic Polymer Blend)
Flavour/ Color	Chamomile, Rose, Lavender, Strawberry, Tea Tree, Honey, Blackberry, Aloe Vera, Cream, Chocolate, Violet, Dark Green, Pearl, Coconut, Lemon, custom formula
Certificate	MSDS
Supply Type	OEM, ODM, Custom Wax Formulas
Packaging	200 Bags per Carton, 40x40x31cm, 21.5KG

Features: (1) Achieve safe, high-quality hair removal with our all-natural hard wax, featuring a soothing scent. Enjoy the convenience of at-home waxing for various areas like hands, legs, face, armpits, and more, especially effective for the bikini line and small regions.

(2) Simply melt the hard wax with a warmer, mix it with a spatula, and apply directly to your skin. Once it cools and hardens, remove it by hand, eliminating over 90% of hair. For any remaining strands, use tweezers or apply a second waxing session.

(3) Experience smooth skin that lasts up to three weeks, with a success rate of 85% to 99%, as waxing extracts hair from the root, promoting slower regrowth and hairlessness for longer periods. Say goodbye to frequent shaving and embrace long-lasting results.

Model	APW-300B1 (300g wax beads per bag)
Form	Wax
Target Area	Face, Eyebrow, Bikini/Brazilian Area, Legs, Arms, Lips, Back etc Body Hair Removal

About Soft Wax, What is soft wax for hair removal?

Wax Types Explained: Soft wax is liquid wax that using a non-woven fabrics muslin strip, applied with a waxing spatula before being removed. The soft wax is suited for larger areas such as arms, legs, bikini line and armpit.

Soft wax is thinly applied to the skin, and a muslin strip is placed on top to remove hair. Following hair removal, the technician uses oil or a wax remover to eliminate any leftover residue from the waxed area.

On the contrary, hard wax is a little different, it is thicker and applied warm with a spatula, once the wax film hardens, it can be removed without the use of a strip. When waxing the face and eyebrow, hard wax is generally used, also hard wax can be used for whole body hair removal.

Soft waxes are usually pack in 14 oz (396g) tin can, 8 oz (226g) tin can, and 3.52 oz (100g) Cartridge for roll-on wax kit.

About Waxing Kit, What is waxing kit for hair removal?

Waxing Kit for hair removal, also called wax kit, had wax kit, soft wax kit, is an all-in-one hair removal kit that usually comes with a wax warmer, some bags of hard wax beads (100g/3.5 oz each), a heat-safe silicone bowl, Pre-Wax Spay, and After-Wax Spay (3 oz each) 10 large and 10 brow wooden or plastic applicators, "How To Wax Guide" User Manual and some other waxing accessories.

The waxing kit is perfect for removing body hair from various areas, including the upper lip, eyebrows, chest, arms, back, legs, Brazilian area/bikini line, and the entire body.

The wax heater machine is equipped with a built-in temperature thermostat that cycles between low and high temperatures to ensure safe heating and prevent overheating. It's designed to melt various types of hair removal wax, such as 8oz and 14oz wax cans, wax beads, soft wax, wax blocks, and paraffin wax, efficiently heating wax in just 30 minutes.

Waxing Accessories

About Waxing Accessories, What is waxing Accessories?

Waxing accessories typically include items used during the waxing process to enhance the experience and results. These accessories can vary depending on the specific waxing kit or product you custom, they are designed to make the waxing process more efficient and comfortable while achieving the best results.

Wooden Spatulas: These are used to apply wax evenly onto the skin. They come in various sizes for different areas of the body.

Pre-Waxing Spray: This spray is applied to the skin before waxing to clean and prepare the area. It helps remove oils, dirt, and sweat, ensuring better wax adhesion.

Post-Waxing Oil or Spray: After waxing, this product is applied to soothe and moisturize the skin, reducing redness and irritation. It can also help remove any residual wax.

Muslin or Non-Woven Strips: These are used with soft wax to cover the applied wax and facilitate hair removal. They are typically used in areas like legs and arms.

Disposable Gloves: Gloves are worn by the waxing technician to maintain hygiene during the procedure.

Paper Towels or Cotton Pads: These are handy for cleaning the skin before and after waxing.

Silicon bowl: A silicone bowl can be used to melt the wax, and it is convenient to clean, any leftover wax in the bowl can be allowed to pull off.
